PROFESSIONAL SUMMARY

Java developer with professional experience from Feb 2020 to Dec 2025 building and maintaining APIs, SaaS applications, REST/SOAP integrations, and legacy systems. Hands-on experience with Java, Spring Boot, SQL, Java EE, JSF, and EJB. Personal projects use PostgreSQL, automated tests, messaging, and service integration.

TECHNICAL SKILLS

Backend: Java, Spring Boot, Spring Data JPA, Spring Security, Java EE, JSF, EJB

APIs & data: REST, SOAP, Swagger/OpenAPI, PostgreSQL, MySQL, SQL

Quality & delivery: JUnit 5, Mockito, AssertJ, Maven, Git, Docker, Docker Compose, GitHub Actions

Frontend: Vue.js, React, JavaScript, TypeScript

PROFESSIONAL EXPERIENCE

MB Company | Junior Developer Feb 2020 - Dec 2025

- Developed and maintained APIs and backend features for SaaS applications and client websites.
- Implemented Java and Spring Boot features and integrated systems through REST APIs and SOAP services.
- Investigated application issues with database queries, bug fixes, and simplification of existing code.
- Maintained Java EE, JSF, and EJB systems; also delivered frontend features with Vue.js when needed.

PERSONAL PROJECTS

Notification API | Java 21, Spring Boot 3, PostgreSQL, RabbitMQ

API for creating, scheduling, and processing notifications with retries, a dead-letter queue, idempotency, and persisted delivery history. 37 automated tests and GitHub Actions CI.

github.com/FernandoTorresD97/notification-api

Art Pizza | Java 21, Spring Boot, PostgreSQL, Vue 3

Order-management API and dashboard. Includes a local fictional-payment lab, signed webhooks, concurrency/idempotency, and a transactional outbox integrated with Notification API. The public demo uses fictional browser-local data and does not charge or send messages. 48 backend tests.
