Professional Summary

Java Developer focused on Backend Development, with experience building applications using **Java, Spring Boot, REST APIs, and PostgreSQL**, working on backend services, business logic, system integrations, and process automation. Experience with **Java EE, JSF, and EJB** in legacy systems, as well as **Docker, Git, Maven, automated testing, GitHub Actions, and Vue.js**. Hands-on experience across the application lifecycle, including implementation, database integration, testing, containerization, and deployment to online environments. Analytical and problem-solving oriented, with a strong focus on building reliable, maintainable, and scalable software.

Professional Experience

Java Developer

2020 – 2025

MB Company

Brazil

- **Backend Development:** Developed and maintained enterprise applications using **Java, Spring Boot, and Java EE**, implementing backend services, components, and business logic.
- **APIs and Integrations:** Developed and integrated **REST APIs and SOAP services**, connecting internal applications with external systems and services.
- **Microservices:** Developed and maintained independent backend services using **Spring Boot**, contributing to the evolution of service-oriented architectures.
- **Legacy Systems:** Maintained and enhanced legacy applications built with **Java EE, JSF, and EJB**, implementing new features and resolving technical issues.
- **Full Stack Development:** Developed end-to-end features using **Spring Boot on the backend and Vue.js on the frontend**.
- **Process Automation:** Developed **cron jobs** to automate recurring processes and business rules.
- **Database Development:** Implemented data access and queries using **PostgreSQL** and relational databases.
- **Version Control and CI:** Used **Git and GitHub** for version control and implemented continuous integration workflows with **GitHub Actions**.

Selected Projects

ClinicFlow

2026

Healthcare Management System – Full Stack / Microservices

GitHub

- **Architecture:** Developed a healthcare management system based on a **microservices architecture**, featuring an API Gateway and independent services for authentication, patients, billing, and notifications.
- **Backend:** Implemented backend services using **Java, Spring Boot, Spring Data JPA, and Spring Security**, exposing REST APIs and enabling service-to-service communication.
- **Security:** Implemented authentication and role-based authorization using **JWT**.
- **Data and Infrastructure:** Used **PostgreSQL, Docker, and Docker Compose**, with independent databases for each service.
- **Frontend:** Developed the frontend using **React, Vite, and TypeScript**, integrated with backend REST APIs.

Notification API

2026

Notification Scheduling and Processing REST API

GitHub

- **Backend:** Developed a REST API using **Java 21, Spring Boot 3, Spring Data JPA, and PostgreSQL**.
- **Processing:** Implemented notification lifecycle management, scheduling, and automated processing using a **scheduled background task**.
- **Quality:** Implemented data validation, global exception handling, and automated tests using **JUnit 5, Mockito, and AssertJ**.
- **DevOps:** Containerized the application using **Docker and Docker Compose** and implemented a CI pipeline with **GitHub Actions**.
- **Documentation:** Documented REST endpoints using **Swagger/OpenAPI**.

Professional Portfolio

2026

Developer Portfolio – Web Application

Online

- **Frontend:** Developed a professional portfolio using **Vue 3, TypeScript, Vite, and Tailwind CSS**.
- **Deployment:** Deployed the application online using **Netlify**, with source code maintained on GitHub.

Technical Skills

Backend & APIs: Java, Spring Boot, Spring Data JPA, Spring Security, Java EE, EJB, JSF, REST APIs, SOAP.
Architecture: Microservices, API Gateway, MVC, SOLID, System Integration, Business Logic.
Databases: PostgreSQL, MySQL, SQL, Relational Databases.
DevOps & Tools: Docker, Docker Compose, Git, GitHub, GitHub Actions, Maven, Swagger/OpenAPI.
Testing: JUnit 5, Mockito, AssertJ, Unit Testing.
Frontend: Vue.js, Vue 3, React, TypeScript, JavaScript, Vite, Tailwind CSS.

Education

Bachelor’s Degree in Systems Analysis and Development **2023 – 2028**
Universidade Norte do Paraná – UNOPAR *Brazil*

Languages

Portuguese **Native**

English **Intermediate**
