Seeking relocation to Portugal; requires a work visa and employer support with the process.

Professional summary

Java developer with nearly six years of experience in APIs, SaaS applications and system maintenance. Worked across backend, frontend and databases using Java, Spring Boot and Vue.js. Personal projects include PostgreSQL, unit testing, Docker and continuous integration.

Professional experience

MB Company | Junior Developer | Feb 2020 - Dec 2025

- Developed and maintained APIs to address requirements and resolve issues in SaaS applications and websites supported by the company.
- Implemented assigned backend and frontend tasks in applications under development, using Java, Spring Boot and Vue.js.
- Worked with database queries and data operations to support features and investigate application issues.
- Adapted and simplified existing code, adjusting functionality and fixing issues based on assigned tasks.
- Maintained Java EE, JSF and EJB systems and integrated REST APIs and SOAP services.

Personal projects

Notification API | Java 21 and Spring Boot 3 | 2026

github.com/FernandoTorresD97/notification-api

- REST API for creating, scheduling and tracking notifications, with PostgreSQL persistence, input validation and exception handling.
- Scheduled processing with simulated delivery; JUnit 5, Mockito and AssertJ tests; Docker Compose, Swagger/OpenAPI and GitHub Actions CI.

ClinicFlow | Java and Spring Boot | 2026

github.com/FernandoTorresD97/clinicflow

- Healthcare management demonstration with authentication, patient, billing and notification services behind an API Gateway.
- JWT, role-based authorization, PostgreSQL per service and Docker Compose; React frontend using JavaScript and Vite.

Technical skills

Backend: Java, Spring Boot, Spring Data JPA, Spring Security, Java EE, JSF, EJB, REST, SOAP.

Data and tools: PostgreSQL, MySQL, SQL, Maven, Git, Docker, Docker Compose, GitHub Actions, Swagger/OpenAPI.

Testing and frontend: JUnit 5, Mockito, AssertJ, Vue.js, React, JavaScript and TypeScript.

Education

Undergraduate Technology Degree in Systems Analysis and Development | UNOPAR
2024 - 2028 | In progress, expected graduation in 2028
